

Fortnite Battle Royale Rules

Fortnite battle royale is just like any other battle royale game. 1.) A player that is playing with multiple people, has to take turns with everyone except those who don't want to play. The player may receive a redo anywhere from dying in 100th place to 86th place, however the player cannot purposely die, the only way the player can get a redo is if they die by someone shooting them. If someone is shooting you, you have to try to fight or it is the next player's turn. 2.) If a player has had many turns in a row, and a person just starts playing, and the person that just started playing wants up to 3 tries, they get 3 tries, redos, or turns, depending on what they want to call it. 3.) If you have been playing duos, or squads and you have played it 4 or more times and a new player comes in the player gets to decide on what they want to do, this also relates to rule number two. 4.) If you are playing with other people, and you get a kill you get to take their loot, but if someone else gets the kill they get that persons loot, you get nothing unless they don't take it. 5.) When playing fortnite majority wins in any kind of topic.
